JAI SHREE®

DIGITAL GROWTH PLAN · 2026

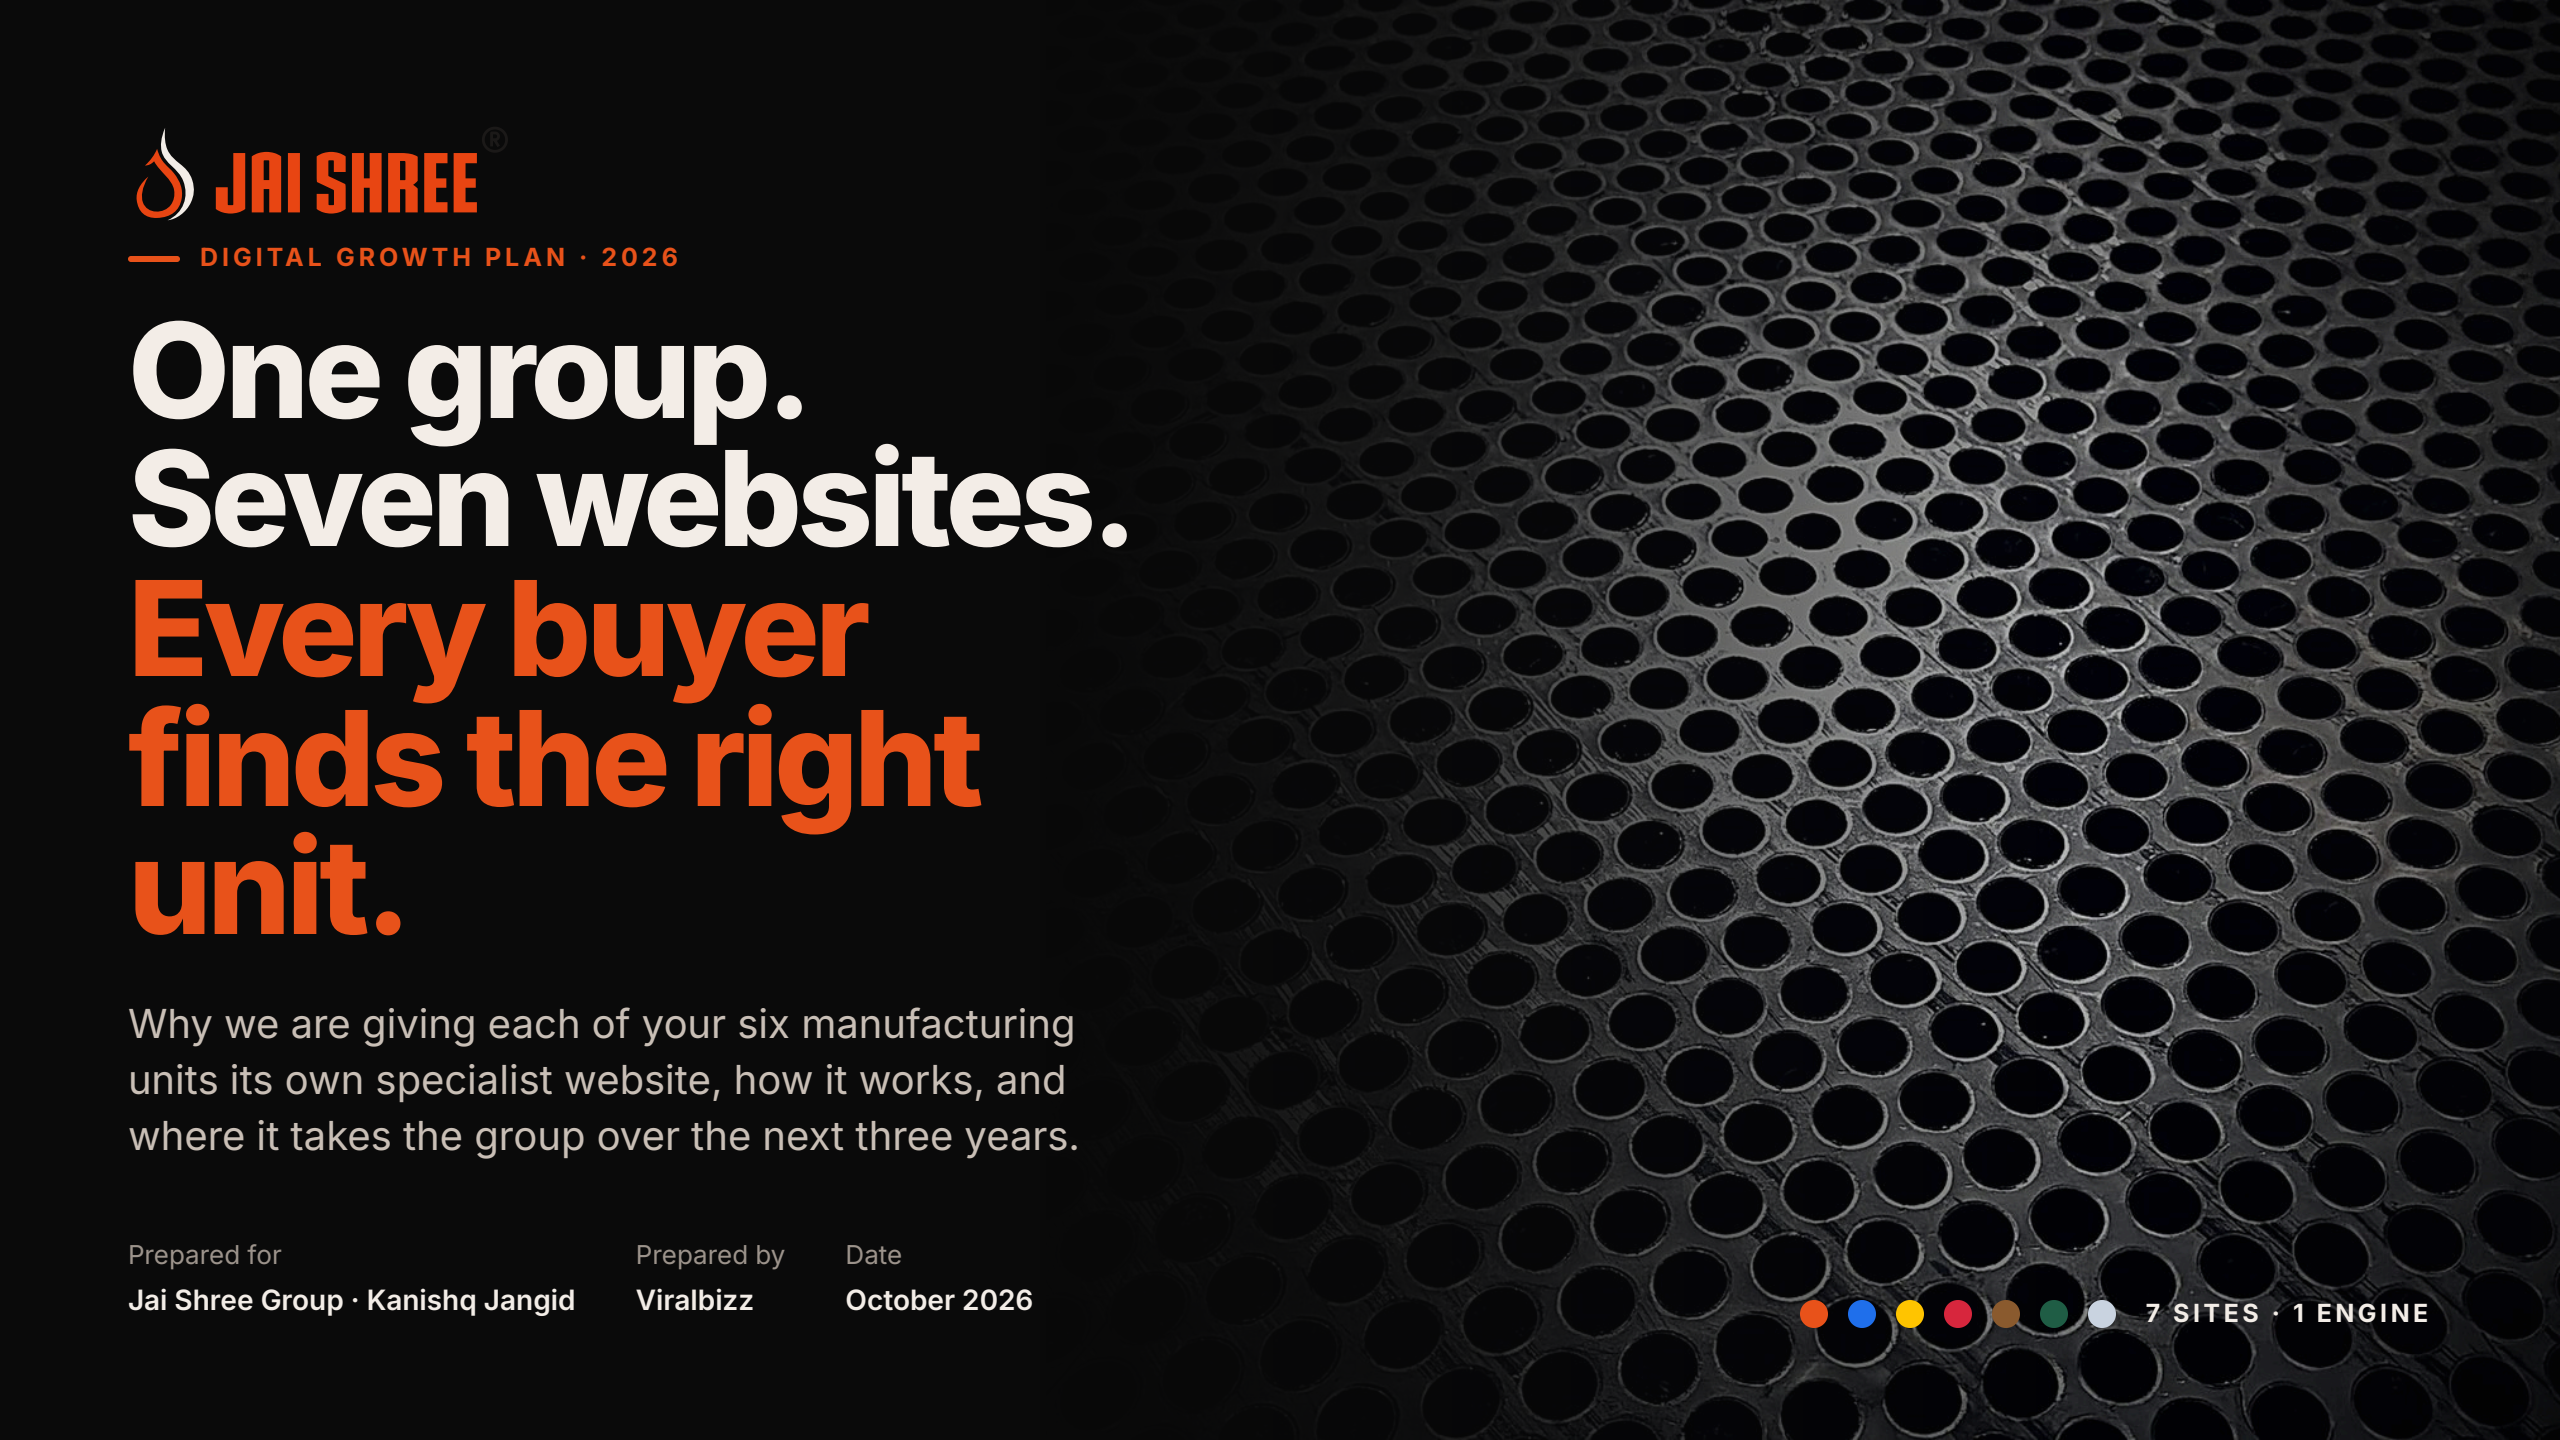

One group. Seven websites. Every buyer finds the right unit.

Why we are giving each of your six manufacturing units its own specialist website, how it works, and where it takes the group over the next three years.

Prepared for
Jai Shree Group · Kanishq Jangid

Prepared by
Viralbizz

Date
October 2026

THE PLAN IN ONE MINUTE

Today one website speaks for six factories. Tomorrow each factory speaks for itself — and they all stay one family.

What we are building

Six specialist websites, one for each unit, plus the main Jai Shree Group site. Each unit site shows only what that unit makes and sends enquiries straight to that unit.

Why

Buyers search for one product in one city: “laser cutting job work Pune”, “expanded metal Mumbai”. A specialist site answers that search far better than one page on a general site.

How

All seven sites run on **one engine** with **one admin panel**. Each looks different to the buyer; behind the scenes it is one system, so a fix or a new feature reaches every site at once.

7
websites: the group site + 6 unit sites

1
engine, admin panel and database for all of them

6
free buyer tools — one per unit — that bring buyers back

✓
Foundation already built and live on jaishreegroup.com

WHAT'S INSIDE

Contents

01 **Where we stand**
Our story, the six units, and the problems buyers face today

02 **The idea**
One group, seven websites, one engine

03 **Meet the six unit sites**
One page per unit: buyers, products, tool and a real-life example

04 **How it works**
One engine, the journey of an enquiry, one admin panel

05 **Benefits and why this approach**
What the group, each unit and each buyer gains

06 **Challenges and how we overcome them**
Risks we have planned for, and protecting what already works

07 **Progress and roadmap**
What is done, what is next, step by step

08 **Long-term vision**
Three horizons, how we measure success, what helps us go further

01

Where we stand

Fifty-six years of manufacturing, six working units, one website. Let us look at what buyers see today.

OUR STORY

From one wire-mesh business in Delhi to six units across Pune and Mumbai

1970 — **The beginning**
Mr. Tejaram Jangid starts a wire mesh business in Delhi.

1980 — **New products**
Perforated sheets and expanded metal join the range.

Mumbai — **Mumbai plant**
Set up by Mr. Inder Jangid and Mr. Shyam Jangid.

1997 — **Talawade, Pune**
Started by Mr. Raichand Jangid.

2006 — **High-tech plant**
A modern plant comes up.

2013 — **Full CNC**
Complete CNC upgrade.

2015 — **Fiber laser**
Laser cutting added.

2026 — **Going digital**
Every unit gets its own home on the internet.

6
active manufacturing units

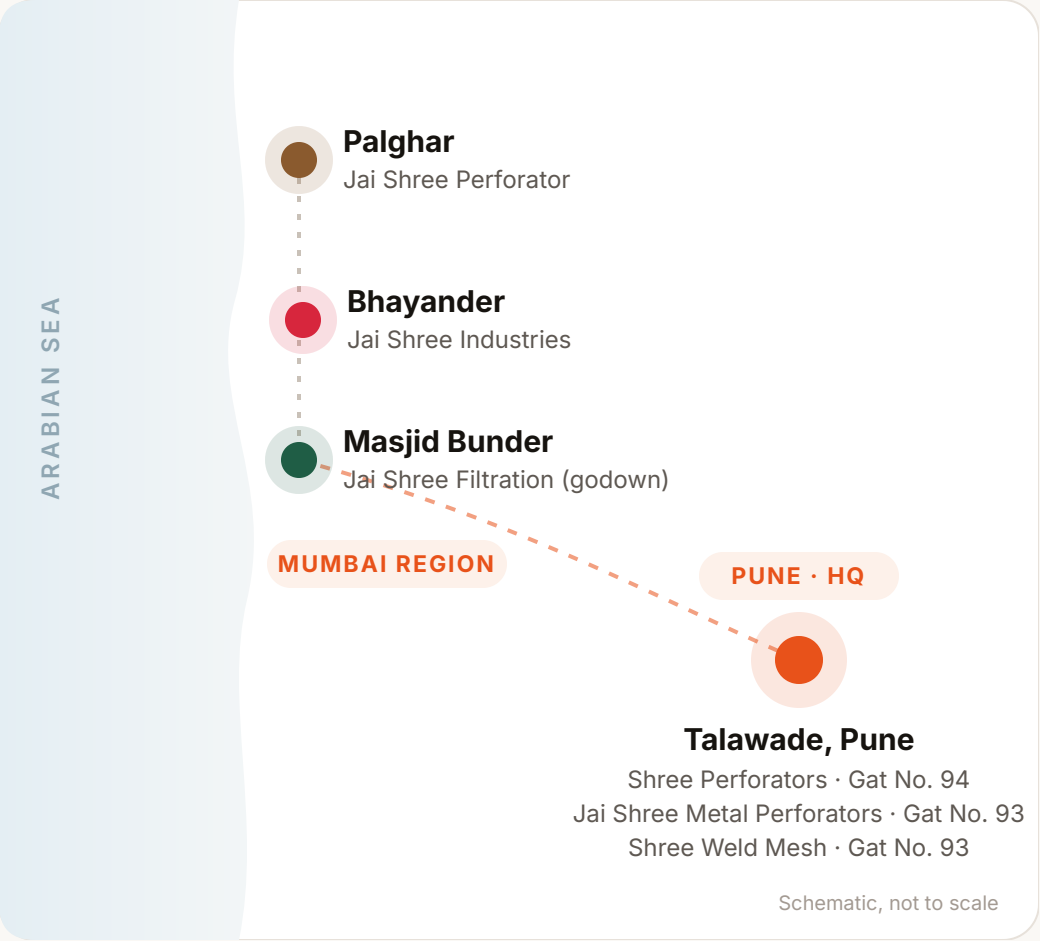

ISO
9001:2015 certified (Bureau Veritas)

0
debt — privately owned

Global
delivery to buyers in India and abroad

THE SIX UNITS TODAY

Six units, two regions, each with its own strength

UNIT	WHAT IT DOES	HOLIDAY
Shree Perforators Talawade, Pune	Perforated sheets and hole patterns, expanded metal, turret punching, leveling, custom parts	Thu
Jai Shree Metal Perforators Talawade, Pune	Laser cutting and CNC punching job work	Thu
Shree Weld Mesh Talawade, Pune	Welded mesh only	Thu
Jai Shree Industries Bhayander, Mumbai	Expanded metal, CNC and mechanical punching	Sun
Jai Shree Perforator Palghar	Mechanical-punched perforated sheets	Sun
Jai Shree Filtration Masjid Bunder, Mumbai	Godown — ready-stock perforated sheets	Sun

Unit focus approved by the client on 7 October 2026.

THE CHALLENGE TODAY

Strong factories, weak shop windows

The units make excellent products, but online most of them are hard to find, out of date, or not there at all.

Four unit domains don't open

metalperforation.co.in, weldedmeshindia.com, jaishreefiltration.com and wiremeshindia.net show “site can't be reached”.

Two old sites are out of date

shreeperforators.com and metalperforatedsheets.com, built by another vendor, still offer products we no longer make.

One site can't rank for everything

A single page cannot be the best answer for perforated sheets, laser cutting, expanded metal and welded mesh in Pune and Mumbai all at once.

Enquiries land in one inbox

A laser job for Talawade and a stock request for Masjid Bunder arrive in the same place and get forwarded by hand. Every hand-off costs time.

A buyer who lands here doesn't call. They click the next result — usually a competitor.

A REAL-LIFE EXAMPLE

Monday, 10 a.m. A buyer needs 200 laser-cut brackets by Friday

A purchase manager at an auto-parts supplier in Chakan opens Google and types **`laser cutting job work Pune`**.

TODAY — What happens now

1. Google shows specialist laser-cutting websites first. A general group page sits lower.
2. If they find an old Talawade unit site, it still lists wire mesh and demister pads — products the group stopped making. Trust drops.
3. No simple way to send the drawing. They email the group address; it is forwarded to the right unit later.
4. By the time someone calls back, a competitor has already quoted.

TOMORROW — What happens with the new sites

1. They find **Jai Shree Metal Perforators** — a site built only for laser cutting and CNC punching job work in Pune.
2. Clear capabilities (fiber laser up to 14 mm), photos of the work, the group's 1970 heritage and ISO certificate.
3. They upload the DXF drawing, pick material, thickness and quantity, and press send — in two minutes.
4. The enquiry reaches the Talawade laser unit directly. The buyer gets an instant reply with a reference number.

Illustrative example of a typical buyer; not a specific customer.

02

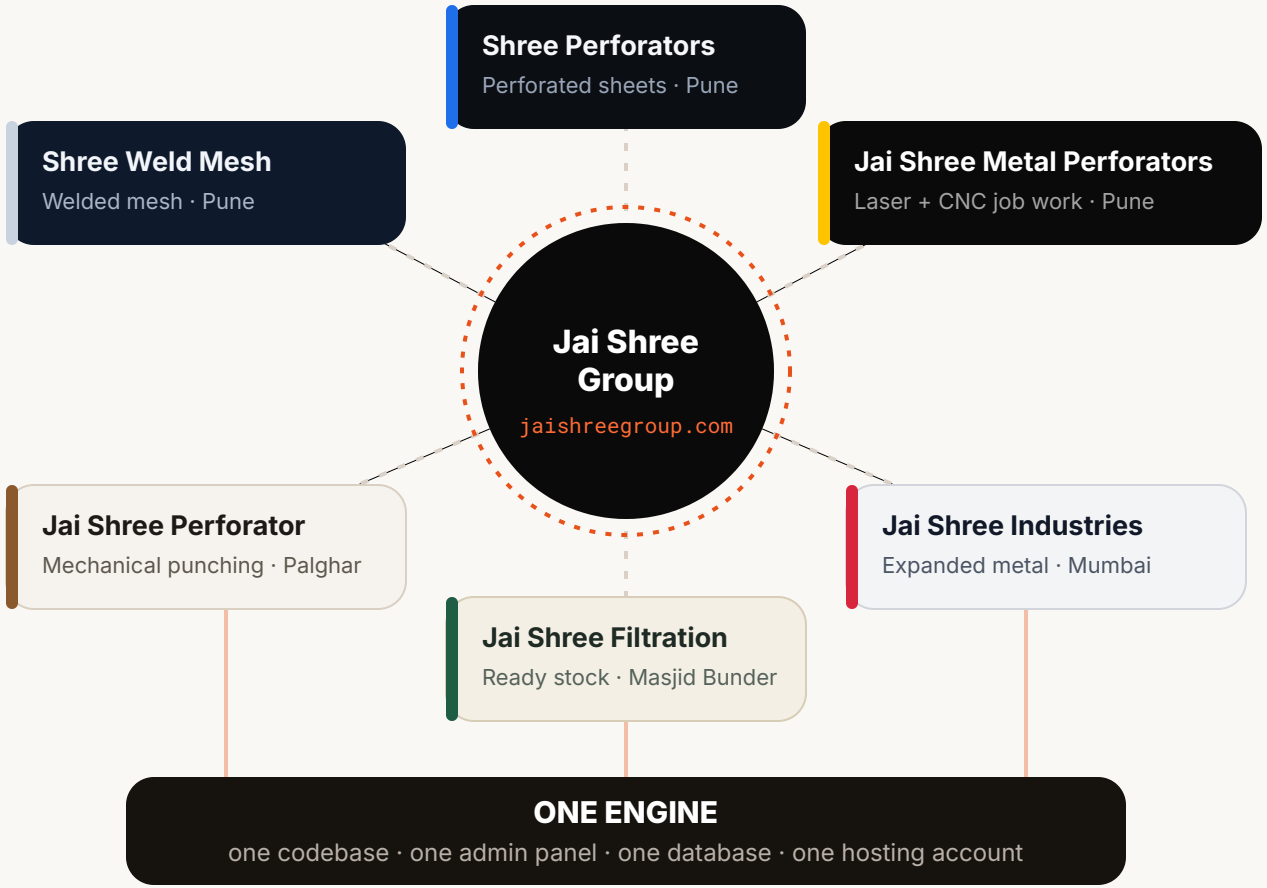

The idea

One group. Seven websites. One engine underneath.

THE BIG IDEA

Seven shop windows, one factory behind them

What the buyer sees

Seven different websites, each with its own name, colours, products, phone number and a free tool built for its buyers. Every unit site carries the mark **“A Jai Shree Group company”**.

What we run

One system. One login to manage every site's enquiries, photos and blog. One place to fix a bug or add a feature — and all seven sites get it the same day.

Think of a CNC turret punch. One machine, many tools. Change the tool and you get a different hole — without buying a new machine. We build one engine and give each unit its own “tool”.

THE SEVEN SITES

Each site has its own focus, buyers and look

00 · MAIN

Jai Shree Group

All units

The group story, all six main products, and a link to every unit.

`jaishreegroup.com · live`

01

Shree Perforators

Talawade, Pune

CNC perforated sheets and custom hole patterns, plus expanded metal.

`shreeperforators.com`

02

Jai Shree Metal Perforators

Talawade, Pune

Laser cutting and CNC punching job work.

`metalperforatedsheets.com`

03

Jai Shree Industries

Bhayander, Mumbai

Expanded metal, plus CNC and mechanical punching.

`new domain`

04

Jai Shree Perforator

Palghar

Mechanical-punched perforated sheets, in bulk.

`metalperforation.co.in`

05

Jai Shree Filtration

Masjid Bunder, Mumbai

“Perforated sheets available in minutes” — ready stock from the godown.

`jaishreefiltration.com`

06

Shree Weld Mesh

Talawade, Pune

“Manufacturing in welded mesh” — welded mesh only.

`weldedmeshindia.com`

THE RULE

Each site sells only what its unit makes

For anything else it points to the sister unit: “Need laser cutting? Our Talawade unit does it.”

03

Meet the six unit sites

One page per unit: who it serves, what it sells, the free tool that brings buyers back, and a real-life example.

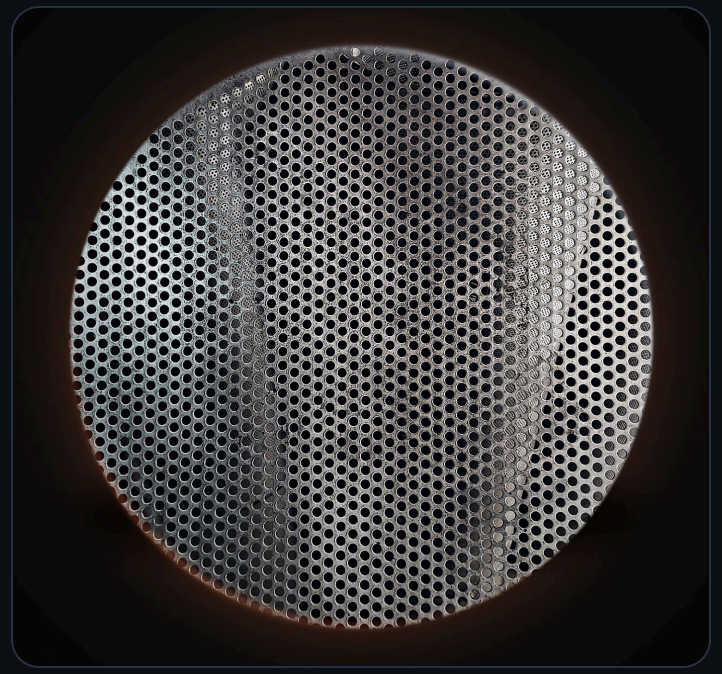

SITE 01 · PUNE

Shree Perforators

Precision perforation, any hole pattern

shreeperforators.com

Unit	Talawade, Pune · Gat No. 94
Phone	+91 93706 06017
Holiday	Thursday
Old site	22 pages + 57 images mapped

Site colours

THE BUYER'S QUESTION

"Can you make this exact pattern?"

WHO BUYS

OEMs, fabricators, filter and equipment makers.

WHAT IT SELLS

- **Perforated sheets**
- **Expanded metal**
- **Turret punching**
- **Sheet leveling**
- **Custom parts & screens**

SEARCHES WE TARGET

- perforated sheet manufacturers Pune
- perforated sheet hole patterns
- SS perforated sheet supplier

FREE TOOL · PATTERN LIBRARY

Hole	Round Ø 3 mm
Pitch · layout	5 mm · 60° staggered
Open area	32.6%

Request this pattern →

EXAMPLE

A filter maker in Bhosari needs a new screen

1. Opens the pattern library, tries hole sizes and pitches.
2. Sees the open area and a live picture of the sheet change as they type.
3. Clicks **Request this pattern** — the quote form arrives filled in.

The unit gets an exact spec, not a vague phone call. Fewer back-and-forth calls, faster quotes.

SISTER UNITS

THE BUYER'S QUESTION

“Can you cut my drawing, quickly and accurately?”

WHO BUYS

Engineering firms, automotive Tier-1 and Tier-2 suppliers, fabricators.

WHAT IT SELLS

- Laser cutting
- CNC turret punching
- Perforated sheets
- Sheet leveling
- Custom parts & screens

SEARCHES WE TARGET

- laser cutting services Pune
- CNC turret punching job work Pune

CAPABILITIES SHOWN

Fiber laser cutting up to 14 mm · perforation up to 12 mm

FREE TOOL · DRAWING UPLOAD QUOTE

bracket-v2.dxf
Uploaded · kept private

Material	MS
Thickness	3 mm
Quantity	200

Send for quote →

EXAMPLE

The Chakan buyer from page 8

1. Drops the DXF (or DWG / PDF) on the page.
2. Picks material, thickness and quantity.
3. Gets a reference number on screen and by email.

The Talawade laser team receives the drawing with every detail they need to quote — no “please send the drawing again”.

SISTER UNITS

Expanded metal? → **Shree Perforators · Jai Shree Industries**

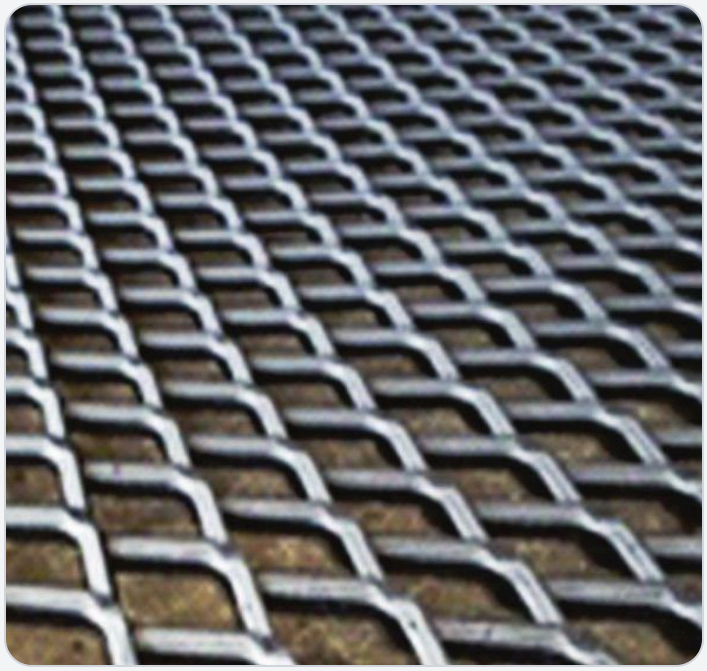

Sheets from stock today? → **Jai Shree Filtration**

SITE 03 · MUMBAI

Jai Shree Industries

Expanded metal and punched sheets near Mumbai

new domain

Unit	**Bhayander East, Mumbai**
Phone	**+91 89089 21111**
Holiday	**Sunday**

Site colours

THE BUYER'S QUESTION

“Who makes expanded metal and punched sheets near Mumbai?”

WHO BUYS

Plant builders, walkway and guard fabricators, OEMs and contractors in the Mumbai region.

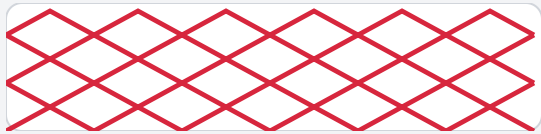

WHAT IT SELLS

- **Expanded metal**
- **CNC & mechanical punching**
- **Perforated sheets**
- **Sheet leveling**

SEARCHES WE TARGET

- expanded metal manufacturers Mumbai
- expanded metal supplier Bhayander
- CNC punching Mumbai

FREE TOOL · EXPANDED METAL SELECTOR

Pattern	**Diamond**
Thickness · material	**3 mm · GI**
Shows	**Open area · kg/m²**

Ask for this size →

EXAMPLE

A contractor plans walkways for a plant near Thane

1. Chooses diamond, square or hex pattern, strand and thickness.
2. Sees open area and an approximate weight per m² — enough to plan the load and budget.
3. Sends the selection to the Bhayander unit in one click.

Patterns up to 6 mm; widths 900 / 1250 / 1500 mm. Results are marked “approximate — confirm with us”.

SISTER UNITS

Laser cutting? → **Jai Shree Metal Perforators**

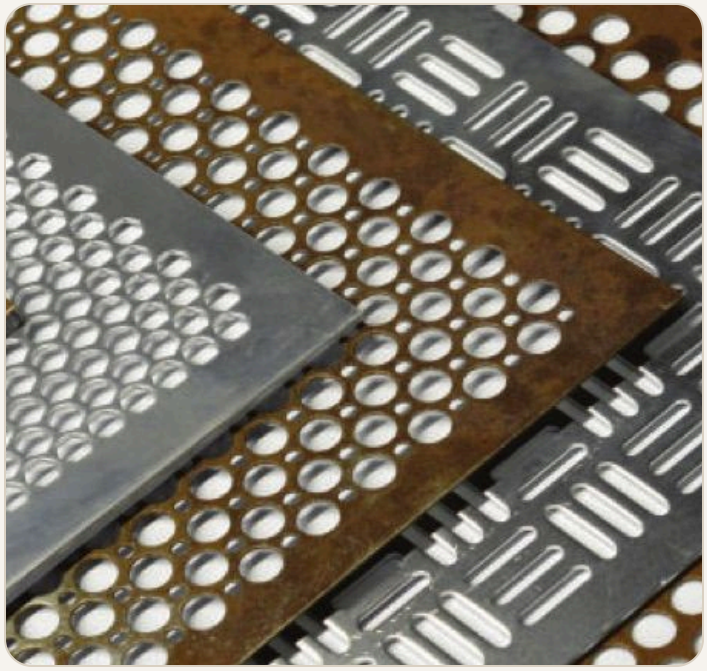

Custom parts & screens? → **Shree Perforators**

SITE 04 · PALGHAR

Jai Shree Perforator

Standard perforated sheets, punched in volume

metalperforation.co.in

Unit	**Palghar West**
Phone	**+91 89089 21111**
Holiday	**Sunday**

Site colours

THE BUYER'S QUESTION

“What is the most economical way to get standard perforated sheets in bulk?”

WHO BUYS

Fabricators, traders and OEMs ordering standard patterns in quantity; industries around Palghar, Boisar and Tarapur.

WHAT IT SELLS

Mechanical-punched perforated sheets

Round · square · slot patterns

SEARCHES WE TARGET

- perforated sheet manufacturers Palghar
- mechanical punching perforated sheets
- perforated sheets Boisar Tarapur

FREE TOOL · BULK ORDER ESTIMATOR

Pattern	**Round 5 mm @ 8 mm**
Material · thickness	**GI · 1 mm**
Sheets	**500**
Open area	**35.4%**
Approx. weight	**≈ 5.1 kg/m²**

Request bulk quote →

EXAMPLE

A trader in Boisar re-orders the same pattern every month

1. Picks a standard pattern, material, thickness and number of sheets.
2. Sees open area and approximate weight to plan transport.
3. Sends a bulk quote request straight to Palghar.

A short, honest guide explains when mechanical punching is the better buy — and when CNC is, so buyers trust the advice.

Holiday **Sunday**

Site colours

THE BUYER'S QUESTION

"Who has perforated sheets in stock today?"

WHO BUYS

Fabricators, contractors and traders in Mumbai who need sheets today, not next week.

WHAT IT SELLS

- **Ready-stock perforated sheets**
- **Pick up or quick dispatch**

SEARCHES WE TARGET

- perforated sheets ready stock Mumbai
- perforated sheet dealer Masjid Bunder
- perforated sheets in stock

FREE TOOL · STOCK CHECK

Material · thickness	SS · 1 mm
Hole size	3 mm
Quantity	10 sheets

Check stock now →

WhatsApp the godown

EXAMPLE

A fabricator's guard job is due tomorrow

1. Searches "perforated sheets ready stock Mumbai" and lands here.
2. Sends material, thickness, hole size and quantity — or taps WhatsApp.
3. The godown replies; the buyer collects from Masjid Bunder.

Behind the form: a **stock board** the team updates from the admin panel. It appears on the site as soon as the first items are added.

SISTER UNITS

Custom size or pattern? → **the group's manufacturing units**

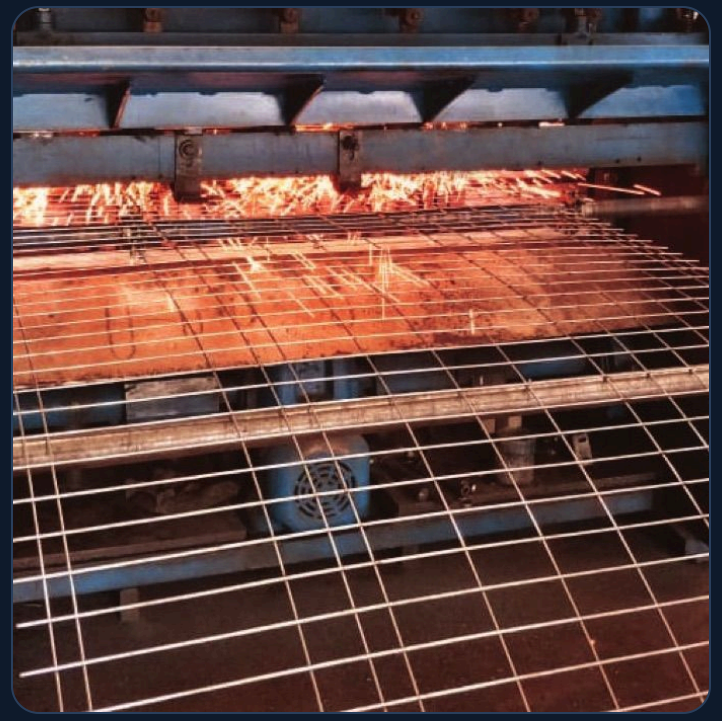

Standard sheets in bulk? → **Jai Shree Perforator**

SITE 06 · PUNE

Shree Weld Mesh

"Manufacturing in welded mesh"

weldedmeshindia.com

Unit	Talawade, Pune · Gat No. 93
Phone	+91 90494 56019
Holiday	Thursday

Site colours

THE BUYER'S QUESTION

"Who makes welded mesh near Pune — and how much will my order weigh?"

WHO BUYS

Construction, fencing, industrial guarding, poultry and agriculture, fabricators.

WHAT IT SELLS

Welded mesh — only

SEARCHES WE TARGET

- welded mesh manufacturers Pune
- welded wire mesh Talawade

FREE TOOL · WEIGHT CALCULATOR

Wire diameter	3 mm
Opening	50 × 50 mm
Approx. weight	≈ 2.2 kg/m²

Tell us your requirement →

EXAMPLE

A fencing contractor quotes a 500 m² boundary

1. Enters wire size and opening.
2. Sees about 2.2 kg per m² — roughly 1.1 tonnes for the job.
3. Sends the requirement straight to Shree Weld Mesh.

The contractor can now plan transport and budget before calling. Results are clearly marked "approximate".

SISTER UNITS

Perforated sheets? → **Shree Perforators**

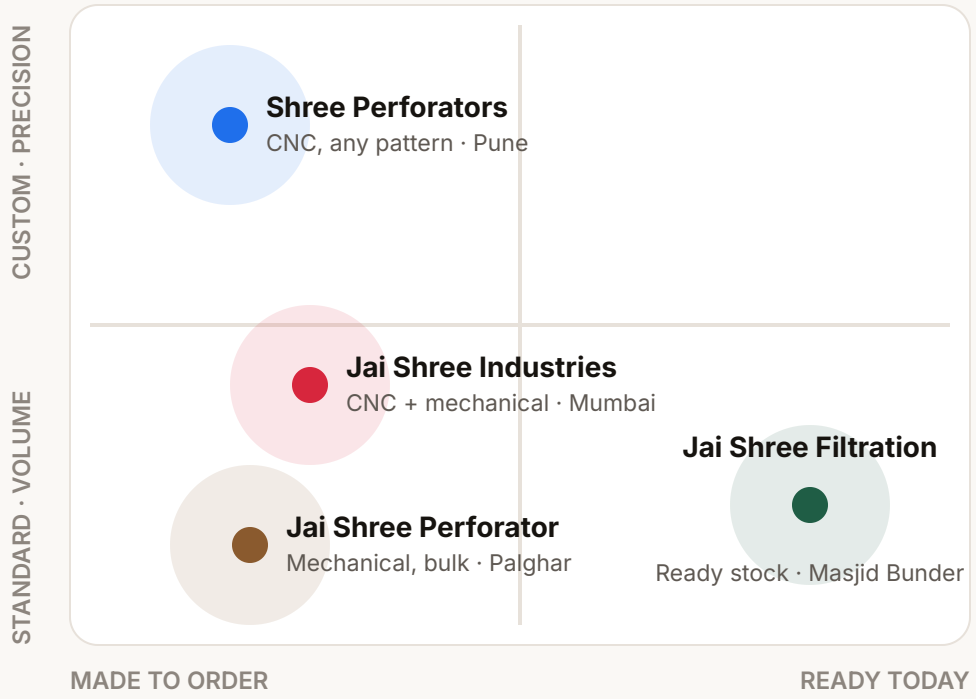

Laser cutting? → **Jai Shree Metal Perforators**

Expanded metal? → **Jai Shree Industries**

FOUR SITES SELL PERFORATED SHEETS

Same product, four different buyers — so four sites help, not compete

Each site answers a different question with its own words. No paragraph is ever copied between sites — Google rewards that, and buyers find the unit that suits them.

SITE	THE BUYER'S QUESTION IT ANSWERS
Shree Perforators	"Can you make this exact pattern?"
Jai Shree Industries	"Who makes expanded metal and punched sheets near Mumbai?"
Jai Shree Perforator	"What is the cheapest way to get standard sheets in bulk?"
Jai Shree Filtration	"Who has perforated sheets in stock today?"

Like four counters in one market. One sells made-to-measure, one sells wholesale, one sells off the shelf. Same family, different customers — and more customers in total.

04

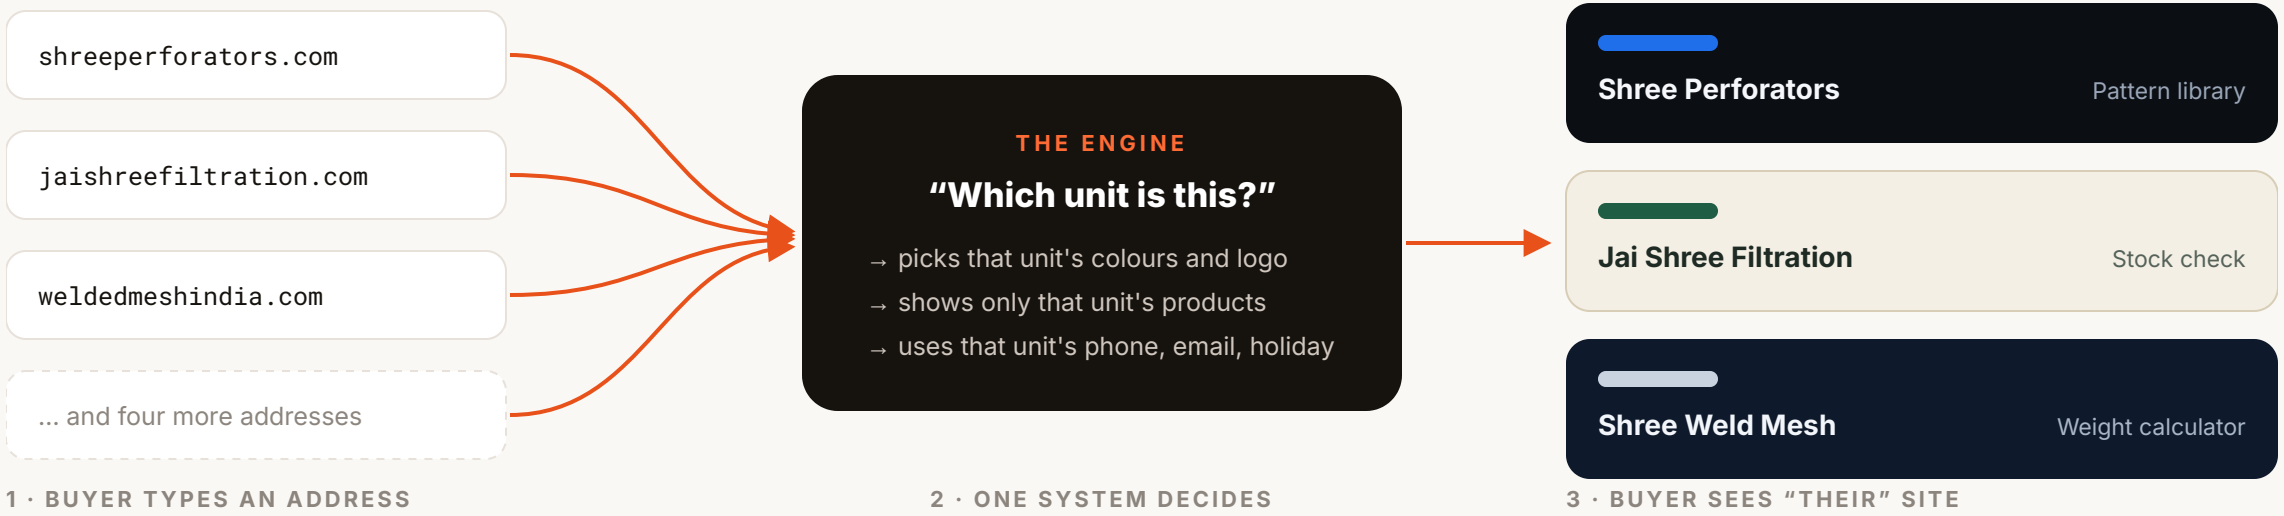

How it works

No jargon: what happens when a buyer types an address, sends an enquiry, and how your team manages it all.

ONE ENGINE, SEVEN FACES

The engine reads the address and dresses the site for that unit

1 · BUYER TYPES AN ADDRESS

2 · ONE SYSTEM DECIDES

3 · BUYER SEES "THEIR" SITE

Fix once, fixed everywhere

A security update or a better quote form goes live on all seven sites on the same day.

New unit? Days, not months

Adding a site means adding its settings and its own words — the engine is already built.

Sites stay separate

Each site has its own address, Google listing and sitemap. One site's pages never show on another's address.

THE JOURNEY OF AN ENQUIRY

From a Google search to the right unit's phone — automatically

01
Search
Buyer searches for a product in their city.

02
Lands on the unit site
Sees only that unit's products, photos and contacts.

03
Uses the free tool
Pattern, drawing, stock or weight — answers in seconds.

04
Sends the enquiry
Form, WhatsApp or call — details already filled in.

05
Right unit is told
Saved with the site's name and emailed to that unit.

06
Buyer gets a reply
Instant email with a reference number and the unit's contacts.

SAMPLE AUTO-REPLY THE BUYER RECEIVES

From: Jai Shree Metal Perforators · Subject: We received your enquiry

Thank you for your enquiry. Your reference is **#7F3A9C21**.
Our Talawade team will contact you. For anything urgent: **+91 93733 24492**.

Why this matters

- **No forwarding:** the unit that makes the product hears first.
- **Buyer feels looked after** the moment they press send.
- **Nothing is lost:** every enquiry is stored with its site, page and date.
- **Reference numbers** make follow-up calls quick: “Ref 7F3A9C21”.

ONE ADMIN PANEL

Every enquiry from every site, in one place

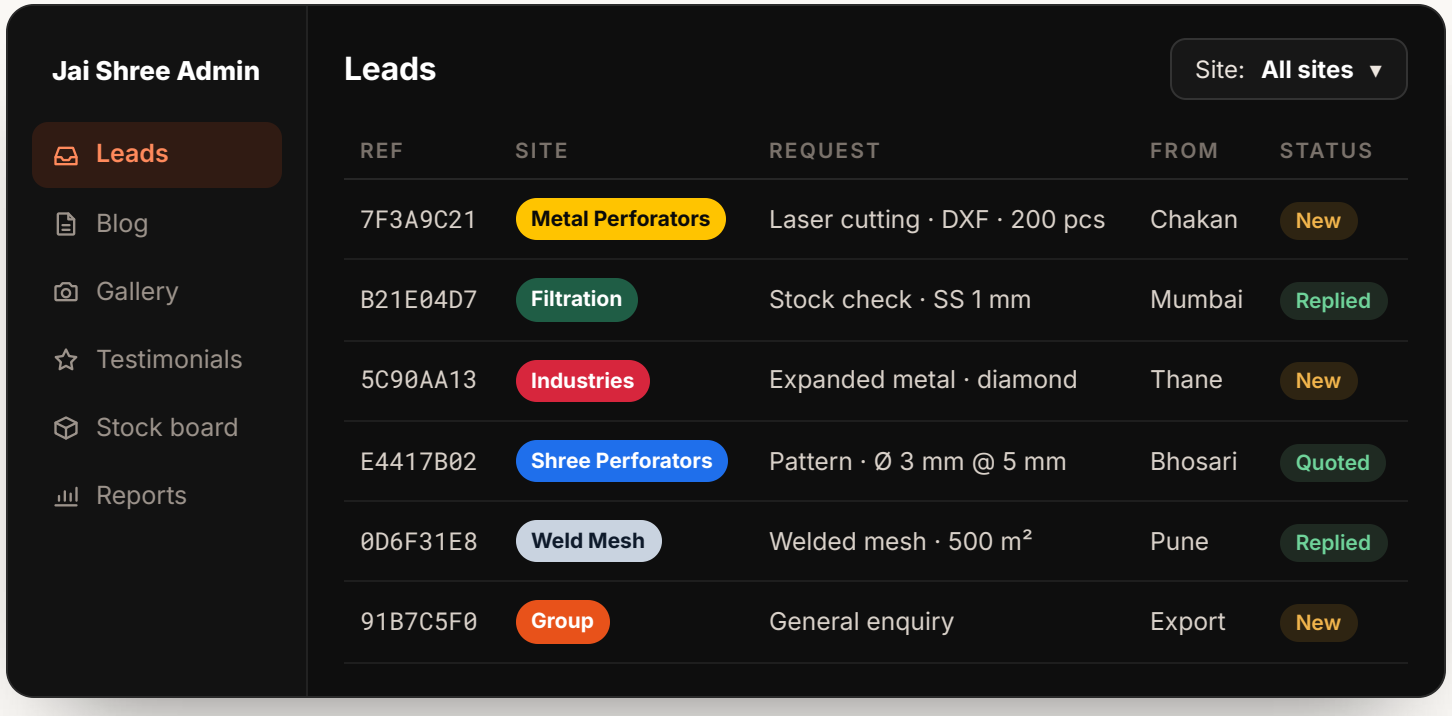

Illustration — sample rows, not real enquiries.

- **Filter by site** — see only Palghar's enquiries, or all of them.
- **Site badge** on every enquiry shows where it came from.
- **Blog, gallery and testimonials** per site, from the same login.
- **Stock board** for the Masjid Bunder godown — update it from a phone.
- **Secure:** only approved admin accounts can see enquiries.

Like one reception desk for six factories. Every call is logged with which factory it is for — and handed over instantly.

05

Benefits and why this approach

What changes for the group, for each unit and for every buyer — and why one engine beats the alternatives.

BENEFITS

Everyone wins: the group, each unit, every buyer

For the group

- Found on Google for many more products and cities
- A modern, consistent image — no dead domains, no outdated products
- One system to run: lower cost than seven separate websites
- Clear numbers each month: enquiries per unit, per product
- Every site points back to jaishreegroup.com and the 1970 heritage

For each unit

- Its own name, look and address on the internet
- Enquiries arrive directly — no waiting for a forward
- Better enquiries: drawing, material, thickness, quantity already filled
- Its own weekly holiday and phone shown correctly
- Its own photos and Google Business Profile

For buyers

- Land on a site that does exactly what they searched for
- A free tool that answers their question in seconds
- WhatsApp, call or form — whichever they prefer
- Instant confirmation with a reference number
- Pointed to the sister unit when they need something else

The result: more of the right enquiries, reaching the right unit, faster — under one trusted group name.

1 → 7
doors into the group for buyers on Google

0
enquiries forwarded by hand

WHY THIS APPROACH

Three ways to do it. Only one gets all the benefits.

	OPTION A **Keep one website**	OPTION B **Six separate websites, built separately**	OUR PLAN **Seven sites on one engine**
Each unit found on Google for its own product and city	✗ Weak	✓ Yes	✓ Yes
Enquiry reaches the right unit directly	✗ No, forwarded	✓ Yes	✓ Yes
One login to manage everything	✓ Yes	✗ Six logins	✓ Yes
A fix or new feature reaches all sites at once	✓ Only one site	✗ Six times the work	✓ Yes
Running cost (hosting, updates, security)	✓ Low	✗ Six times	✓ Close to one site
Consistent quality and group brand	✓ Yes	– Drifts apart	✓ Yes
Old Google rankings of the two live unit sites kept	✗ Lost	– Depends	✓ Yes, page by page

Option B is what the group had before: two sites from another vendor and four domains that stopped working.

06

Challenges and how we overcome them

Every plan has risks. Here is each one we have found, and what we have already put in place.

CHALLENGES → SOLUTIONS

What could go wrong, and what we do about it

Google may see similar sites as copies

→ Every site gets its own words, its own angle and its own searches. Shared design, never shared paragraphs.

Two live unit sites could lose their Google rankings

→ Every old page is mapped to its new page and forwarded permanently (38 pages + 57 images already mapped).

Building could break the live main site

→ Work happens on a separate copy. Before going live we compared 80 screenshots of 40 pages — no unintended change.

Missing content: unit photos, logos, stock list

→ We launch with safe fallbacks (group mark + unit name, product photos). We never invent specs, stock or clients.

Enquiries going to the wrong person

→ Each site carries its unit's phone and email. Every enquiry is tagged with its site and routed automatically.

Buyers confused about who is who

→ Every unit site says “A Jai Shree Group company”; the group's Our Group page links to all six.

Enquiry data in the wrong hands

→ Admin access is locked to approved accounts; uploaded drawings will be kept in private storage. Privacy and terms pages follow India's DPDP Act 2023.

Seven sites = seven times the upkeep?

→ No: one engine. One update, one security patch, one hosting bill for all seven.

PROTECTING WHAT ALREADY WORKS

Old pages get a forwarding address

shreeperforators.com and metalperforatedsheets.com have been on Google for years. When the new sites go live, every old page sends its visitors — and its Google credit — to the matching new page.

/perforated-sheets.html	301 →	/products/perforated-sheets
/expanded-metal-perforated-…	301 →	/products/expanded-metal
/contact.html	301 →	/contact
/wire-mesh.html	301 →	/products

Pages for products the group no longer makes (like wire mesh) forward to the products page — never to a page offering them.

22 + 57

pages and images on shreeperforators.com, each mapped to a new page

16

pages on metalperforatedsheets.com, each mapped to a new page

Like moving office and leaving a forwarding address with the post office — no letter gets lost.

07

Progress and roadmap

The foundation is built and already live. Now we add the unit sites, one at a time, each checked before it goes live.

WHAT IS ALREADY DONE

The hard part — the engine — is built and live

Step 0 · Live-site fixes — LIVE

- New phone numbers for three units
- Weekly holidays on the contact page (Thu Pune · Sun Mumbai)
- Location map fixed
- Links to dead unit domains hidden
- Discontinued products removed from the copy

Phase 0 · The engine — LIVE

- One app that picks the site by its address
- Colour system so each site gets its own look
- Per-site Google setup: titles, sitemap, business data
- Every enquiry tagged with its site, emailed to its unit
- Instant reply with a reference number
- Privacy and terms pages · admin access secured

Phase 1 · First unit site — IN PROGRESS

- Old shreeperforators.com crawled; forwarding map drafted
- All pages and sections now read the active site
- Next: Shree Perforators site with its own copy
- Then: pattern library tool
- Then: forwarding live and launch checks

Overall build — `foundation done · 6 sites to go`

Step 0 · Phase 0 · Phase 1 · Phase 2 · Phase 3 · Phase 4

ROADMAP

Step by step: each site goes live only after it passes its checks

STEP 0

Fix the live site

- Correct phones and holidays
- Remove outdated products
- Fix the map

Done

PHASE 0

Build the engine

- One app, many addresses
- Per-site look and Google setup
- Enquiries per unit
- Main site unchanged

Done · live

PHASE 1 · PILOT

Shree Perforators

- Site and copy
- Pattern library
- Old pages forwarded
- Launch checks

Now

PHASE 2

Jai Shree Metal Perforators

- Site and copy
- Drawing upload quote
- Old pages forwarded
- Machine list (when shared)

Next

PHASE 3

Four more sites

- Jai Shree Industries — selector
- Jai Shree Perforator — bulk estimator
- Jai Shree Filtration — stock check
- Shree Weld Mesh — weight calculator

About one a week

PHASE 4

Go live and grow

- Google Search Console per site
- Google Business Profile per unit
- Our Group page links all six
- Monthly report per site

After launch

Why the two old sites go first: they already rank on Google, so protecting and upgrading them brings results fastest.

08

The long-term vision

Where this takes Jai Shree Group over the next three years.

VISION

When a buyer anywhere searches for a metal sheet product we make, a Jai Shree unit is the first name they find.

HORIZON 1

Launch

Now → all six sites live

- → Six unit sites, one by one, each with its free tool
- → Old pages forwarded, rankings kept
- → Every enquiry routed to its unit
- → Google Business Profile per unit

HORIZON 2

Grow

First year after launch

- → A blog per site on its own product topics
- → Real unit photos, machine list, stock board filled
- → Monthly report: which site, which product, which city
- → Tune pages to the searches that actually bring buyers

HORIZON 3

Lead

Years two and three

- → Each unit a known name for its product in its region
- → Decisions on capacity and stock guided by enquiry data
- → More buyer tools and export pages on the same engine
- → A new unit or product line gets a site in days

HOW WE MEASURE SUCCESS

A monthly report for each site — numbers, not opinions

Enquiries
How many buyers contacted each unit, by product.

Enquiries won
How many turned into orders — the number that pays.

Time to first reply
How fast each unit answers. Faster replies win more jobs.

Search clicks
How many people reached each site from Google.

Target-search positions
Where each site appears for its key searches.

Tool use
How many buyers used each free tool — and then asked for a quote.

Trend lines are illustrations of the report layout, not forecasts. Real numbers start the month each site goes live.

WHAT HELPS US GO FURTHER

We launch without waiting. These make each site even stronger.

Nothing here blocks the build. Whenever the units can share them, we add them — most can be uploaded straight from the admin panel.

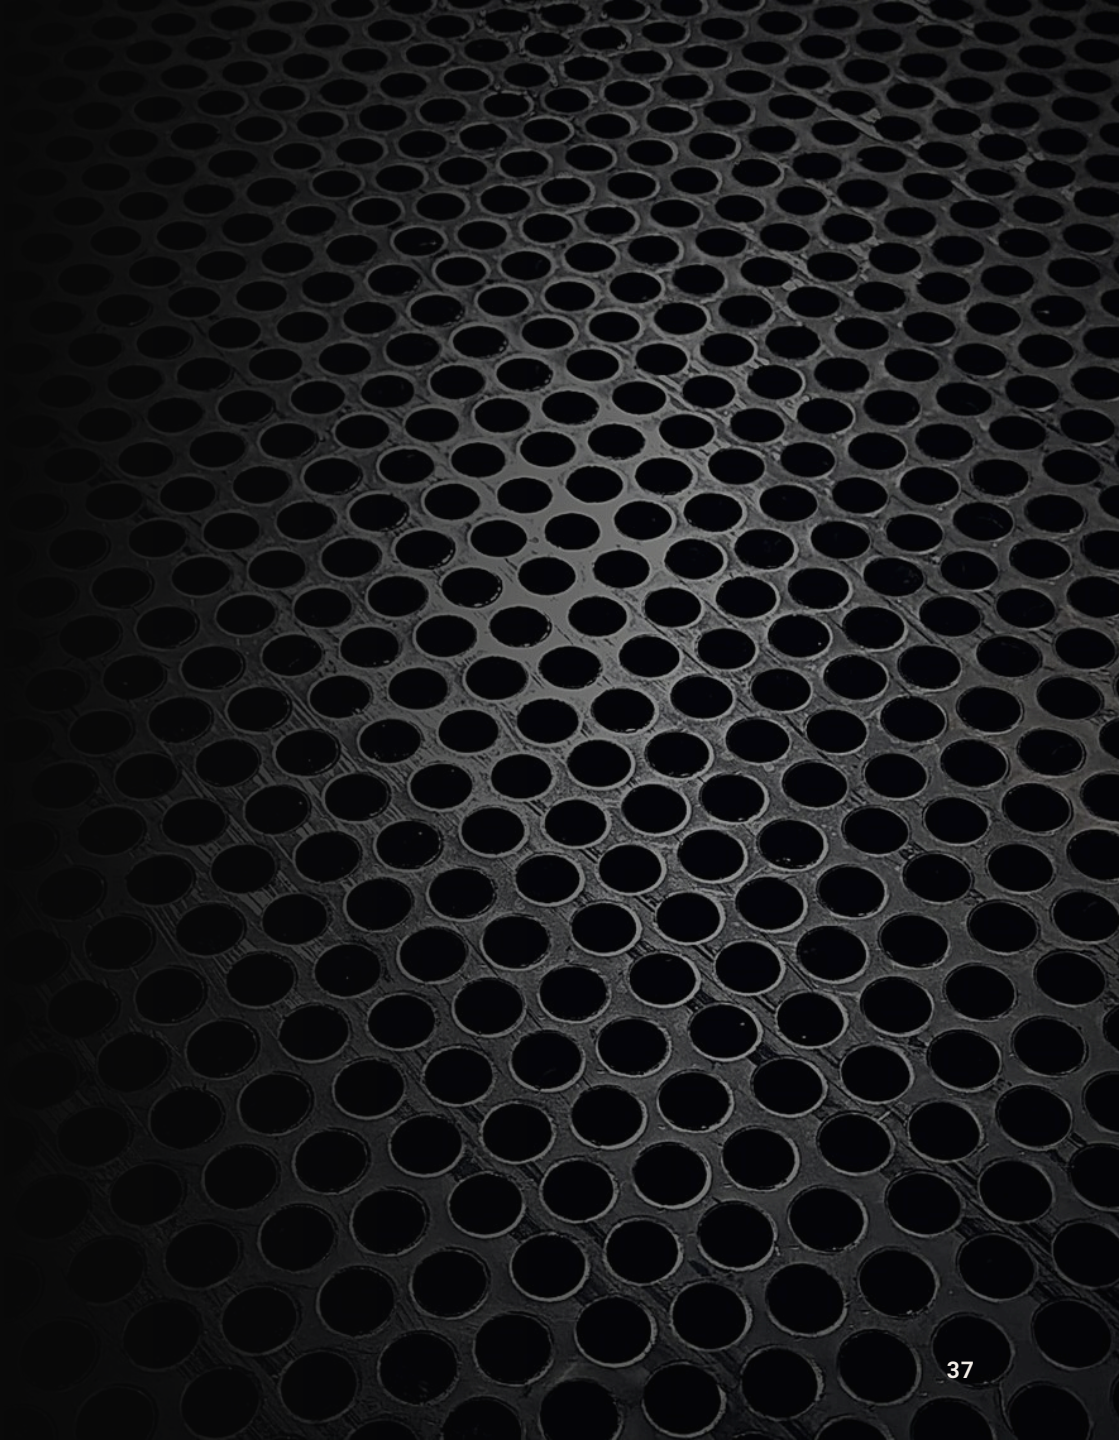

ITEM	WHICH SITES	UNTIL THEN, WE SHOW
Photos of each unit and its machines	All six	Photos of that unit's products only
Unit logos	All six	Group flame mark + unit name + "A Jai Shree Group company"
Working hours	All six	Weekly holiday + "Call or WhatsApp for timings"
Ready-stock list	Jai Shree Filtration	"Check stock now" form and WhatsApp; stock board appears once filled
Machine list	Jai Shree Metal Perforators	Known capabilities: laser up to 14 mm, perforation up to 12 mm
Welded mesh range	Shree Weld Mesh	General description; "tell us your requirement"
Standard sizes and pattern lists	Jai Shree Industries · Jai Shree Perforator	Known specs and common patterns, marked as examples
Client names and case studies	All six	Industries we serve (no client names until approved)

JAI SHREE®

Accept Challenges. Develop. Achieve.

Since 1970 the group has grown by taking on new challenges. Seven websites on one engine is the next one — and the foundation is already live.

CLIENT	AGENCY	MAIN SITE
